

## Auction Compliance Disclosures

The following information is being posted voluntarily by Southern Companies in conjunction with the Energy Auction and in an effort to keep participants informed about the implementation and operation of the Energy Auction. Participants should continue to direct requests for more information, as well as questions, comments or complaints, to the Auction Administrator or the Independent Auction Monitor utilizing the links provided on the previous page.

- On November 26, 2025, Southern became aware that offers for the 11/28/2025 Day-Ahead Auction were not submitted. Southern researched the issue and has determined that the submissions were made for the Day-Ahead Auction, but the offers did not post to the Auction platform due to the Independent Auction Administrator inadvertently neglecting to change system settings in time to process Southern's earlier submission of offers (due to the Thanksgiving Day Holiday). Southern is working with the Independent Auction Administrator on appropriate measures to avoid such an event in the future. (Posted 12/8/25)
- On November 21, 2025, Southern became aware that an hourly trader entered into one, one-hour, into SOCO sale transaction inside the Hour-Ahead Energy Auction window on October 2, 2025. The sale was for HE 6 (25 MW). The Available Capacity offered in the corresponding Hour Ahead Energy Auction was not reduced for this transaction and the outcome of the auction was not affected.
