June 10, 2022

Southern Company is considering the purchase of sub-bituminous coal to meet a portion of the coal requirements at Southern Company Plants Miller, Scherer, and Daniel.

**QUANTITY & TERM**

Buyer is considering purchasing the following:

- Up to 7,000,000 tons for Calendar Year 2023 deliveries
- Up to 8,000,000 tons for Calendar Year 2024 deliveries
- Up to 8,000,000 tons for Calendar Year 2025 deliveries

**QUANTITY AND TERM WILL BE DETERMINED BY BUYER, BASED ON BID EVALUATION AND WILL BE NOMINATED BY BUYER AT TIME OF BID ACCEPTANCE. IF SELLER’S PRICE IS DEPENDENT UPON A CERTAIN QUANTITY AND TERM, SELLER MUST SPECIFY.**

**PRICING**

Seller is requested to submit pricing based on fixed price f.o.b. mine. 
**Bids shall remain valid through July 30, 2022.**

**INTERNET BIDS ONLY**

Internet Bids only will be received through **12:00 p.m. EST, Friday, June 24, 2022.** Bids need to be submitted under the RFP solicited folder “Southern Co – PRB 2023-2025 Solicitation”. The Internet Coal Sales Proposal screen must be entirely and correctly completed. The Producer-Broker information should be completed where applicable, for bid consideration. **Faxed or mailed bids will not be considered.** If you have any business questions concerning a Request for Proposal, please contact the fuels agent listed in the RFP directly. If you have already registered as a new user in CIBS and need to have your personal and business information entered into the system please email Southern Company Fuel Services: CIBSFUEL@SOUTHERNCO.COM

If you need technical support regarding the Coal Internet Bid System, please contact CIBS Tech Support: CIBSTECH@SOUTHERNCO.COM

**FLEXIBILITY/OPTION TONS**

Buyer is looking for Seller to provide any flexibility/option tons in scheduled shipments. If Seller desires to provide any flexibility, the conditions of the flexibility can be outlined under the
comment section of the bid. It is not the intent of Buyer to resell or remarket flexible/option quantities.

RAIL SHIPMENTS

Offers from all Burlington Northern Santa Fe (BNSF) and Union Pacific (UP) origins will be considered.

Offered coal must have a sulfur level no greater than 0.6 lbs per million Btu or 1.2 lbs SO2 per million Btu. Seller must have, at the loading point, a mechanical sampling system of “cutting the full coal stream” type or other system acceptable to Buyer in order to have the proposal considered. Samples taken by Seller at the loading point will be analyzed by Buyer and will govern for payment and quality administration purposes. Please include with the proposal additional information about Seller’s ability to meet the sampling requirements of this bid. Seller will be required to determine the sulfur, btu/lb, ash and moisture content of each shipment of coal. Seller will provide an Electronic Data Interchange (EDI) to Buyer prior to the arrival of each coal shipment at the destination plant which will include the manifest and quality for each shipment. Fax and/or email will not be proof of shipment and quality.

If Seller has certified scales that conform to the Association of American Railroads “Scale Handbook,” Seller’s scales may be used to determine the weight of coal sold, subject to the approval of Buyer. Please include information about Seller’s weighing system with the proposal. In the absence of acceptable scale weights from Seller, the weight of coal sold and delivered shall be determined by railroad scales.

Shipments must be loaded in electro-pneumatic quick dump hopper cars. Unit train shipments will be scheduled by the SCS Fuel Department after Seller’s transportation coordinator has received complete purchase documentation (i.e. Purchase Order and Terms and Conditions). Seller must be prepared to load unit trains 7 days per week, 24 hours per day.

Price should be quoted f.o.b. railcar at the proposed loading facility.

ANALYSIS

All Sellers are required to return analyses of the coal offered (taken and analyzed within six months of bid opening date) that will represent the quality of shipments under a Purchase Agreement. The analyses must include the hardgrove grindability index, a short proximate analysis (including Btu, sulfur, and four point reducing atmosphere ash fusion temperature), an ash mineral analysis, an ultimate analysis, and a trace element analysis (including arsenic, barium, beryllium, chlorine, chromium, cobalt, copper, fluorine, lead, mercury, nickel, manganese, and vanadium). These items should be shown in percentages.
CALORIFIC VALUE

Please note that negative calorific value adjustments will be based on the total delivered price, including transportation costs. Positive calorific value adjustments will be based on f.o.b. mine price. **In order to avoid negative calorific value adjustments, please base guaranteed calorific value on demonstrated typical quality.** If Seller takes exception to this provision, then the bid evaluation will be based on the rejection limit for Btu/Lb specified in the attached Coal Sales Proposal form and the quoted price will be btu-adjusted to that value.

SULFUR

For all units with scrubbers in service during the term specified in the solicitation no sulfur adjustments shall apply to those scrubbed units and Purchaser will take this into consideration when evaluating bids. Seller should base his bid price on demonstrated typical sulfur quality.

MISREPRESENTATIONS OF QUALITY

There are serious economic and operational costs associated with the receipt of off-specification coals. Because of this fact, we urge you to represent Seller’s coal as it will typically be received. Sellers who consistently ship coal which is outside the guaranteed specification range will be removed from the Southern Company bid list indefinitely.

TERMS AND CONDITIONS

Per the Terms and Conditions of the existing Master Coal Sales Agreement with Seller.

SUPPLIER DIVERSITY

The Seller acknowledges that the Buyer is committed to the ongoing growth and development of Small and Diverse Suppliers, as defined in this Section. The Seller acknowledges that it is important to the Buyer that it operates a Supplier Diversity Program that strongly encourages contracting opportunities to firms that are certified as having met the definition of a small business concern (“Small”) which meets the Small Business Administration (SBA) size standards, or being at least 51% owned, controlled and operated by one or more members of the following diverse groups: women, African Americans, Asian-Pacific Americans, Sub-continent Asian Americans, Hispanic Americans, Native Americans, LGBT, disabled individuals and veterans ("Diverse Suppliers").

Upon execution of an Agreement with the Seller, the Buyer requests Seller provide quarterly reports to Buyer related to its Diversity Spend including the amount or percentage of Seller’s business paid to these Small or Diverse Suppliers (the “Second Tier Report”). Instructions on the reporting process will be provided to Seller by Southern Company Supplier Diversity.
Seller should actively seek qualified Small or Diverse Suppliers to compete for Seller's business on a fair and even basis and provide such Small or Diverse Suppliers the maximum practicable opportunity to participate in the contracts and orders it may award in connection with this Agreement as part of its Second Tier Plan. In support of aligning qualified Small or Diverse Suppliers with the Seller’s prime suppliers, the Buyer may assist the Seller in the identification of such suppliers in its efforts to advance contracting and/or business development efforts.

Seller should use reasonable efforts, to source, utilize and pay Small or Diverse Suppliers for goods and services. Seller acknowledges and agrees that efforts with this Section is important to the Agreement.

**EVALUATION**

Seller proposals will be evaluated using the bid price, sulfur and mercury content, and NOx emissions (where applicable) to determine a bid ranking based on $/MMBtu delivered cost. **Buyer will also take into consideration the cost associated with applying a dust control to coal loaded into purchaser’s railcars.**

The evaluation will be based on the most attractive total package, including delivered price ($/MMBtu), quality, reliability, and quantity flexibility. Buyer reserves the right to reject any and all bid proposals.

If you have any questions or require additional information, please contact me at (205) 613-2190.

Sincerely,

David G. Courtenay
